the book provides tools for visualizing space and walks the designer through other considerations such as building code requirements and environmental control needs

as society rapidly changes so too does our relationship with design and the spaces of the designed world meanings of designed

spaces is a collection of articles by and interviews with renowned design academics and professionals exploring how people make meaning using design today and how designed space both shapes and is shaped by technology business ethics culture sustainability and society questions posed include how does designing our world provide meaning in our lives how is this meaning constructed what is design research within this framework how do interiors influence our social cultural and psychological ways of being how is the designer's role evolving in relationship to other stakeholders what are possible ways we can understand and respond to the social political ethical and cultural issues we face the book's subject matter moves from the theoretical to the practical and includes at times contradictory viewpoints providing a springboard for conversation and debate

the study of human body measurements on a comparative basis is known as anthropometrics its applicability to the design process is seen in the physical fit or interface between the human body and the various components of interior space human dimension and interior space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors including interior designers architects furniture designers builders industrial designers and students of design the use of anthropometric data although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process this comprehensive overview of anthropometrics consists of three parts the first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people it provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established the second part contains easy to read illustrated anthropometric tables which provide the most current data available on human body size organized by age and percentile groupings also included is data relative to the range of joint motion and body sizes of children the third part contains hundreds of dimensioned drawings illustrating in plan and section the proper anthropometrically based relationship between user and space the types of spaces range from residential and commercial to recreational and institutional and all dimensions include metric conversions in the epilogue the authors challenge the interior design profession the building industry and the furniture manufacturer to seriously explore the problem of adjustability in design they expose the fallacy of designing to accommodate the so called average man who in fact does not exist using government data including studies prepared by dr howard stoudt dr albert damon and dr ross mcfarland formerly of the harvard school of public health and jean roberts of the u s public health service panero and zelnik have devised a system of interior design reference standards easily understood through a series of charts and situation drawings with human dimension and interior space these standards are now accessible to all designers of interior environments

shaping interior space 3rd edition emphasizes the impact that designers make through their spatial compositions and design manipulations intended for intermediate and advanced students the author covers strategies for creating interior environments that work as a total system to enhance the experience of the user the text places the emphasis on design virtues other than function and aesthetics to more fully address the designer s role in providing appropriate amounts of order enrichment and expression based on the ten principles introduced in the first chapter the new edition s reorganization continues to be driven by the sequential presentation of the book s themes and not by the strict sequence of steps in the design process the revised organization of the table of contents addresses what designers need to know and what designers need to do for their clients
