bachelor thesis from the year 2014 in the subject engineering industrial engineering and management grade 1 7 wilhelm büchner hochschule private fernhochschule darmstadt fachbereich ingenieurwissenschaften informatik wirtschaftsingenieurwesen und technologiemanagement language english abstract the purpose of this thesis is to examine the application of sustainable supply chain management sscm in the growing industry of consumer electronics the research intends to look for patterns in respect to the implementation of sscm programs within selected consumer electronics focused businesses using a case study analysis the aim of this paper is to investigate which concepts of implementation and design of sscm are available in the

consumer electronics industry and to analyze how they can be classified the primary sources for the main analysis of this paper are the sustainability reports from the four companies dell philips samsung and sony these companies were selected based on their location size and ranking within the industry and the method of selection is explained herein following a first look at the data a process oriented approach was chosen for the study and a careful analysis leads to the formation of a model describing the process of achieving supply chain sustainability in the consumer electronics industry the sustainability achievement process comprises eight phases 1 acknowledgement 2 vision and strategy 3 communication 4 assessment 5 goal setting 6 goal achievement 7 expanding the reach and 8 maintaining the success the model is refined and substantiated in the subsequent cross case analysis by illustrating the distinctive features of each phase within each company furthermore the author identifies indicators and keywords for every phase which permit the unambiguous association of statements to levels of sustainability achievement for easy classification critical cases are recognized examined and solved during the research in order to provide a framework for a real world application overall the derived model provides the foundation for the evaluation of a corporation s progress concerning different aspects of sustainability the thesis concludes by proposing a series of approaches for future research to increase the verification of the model and advance it potentially extending the applicability of the model to sscm in general

matlab simpowersystems is a modern design tool that allows scientists and engineers to rapidly and easily build models that simulate power systems not only can you draw the circuit topology rapidly but your analysis of the circuit can include interactions with mechanical thermal control and other disciplines the paper covers some case studies that provide detailed realistic examples of how to use simpowersystems in power system analysis the following types of studies are covered on the paper 1 thyristor based static var compensator study the steady state and dynamic performance of a static var compensator svc on a transmission system 2 transient stability of a power system with svc and pss study of the application of static var compensator svc and power system stabilizers pss to improve transient stability and power oscillation damping of the system 3 gto based statcom study the steady state and dynamic performance of a static synchronous compensator statcom on a transmission system 4 control of load flow using upfc study the steady state and dynamic performance of a unified power flow controller upfc 5 variable frequency induction motor drive study of a pwm inverter is used as a variable voltage variable frequency source to drive an induction motor in variable speed operation 6 chopper fed dc motor drive study of a dc motor drive with armature voltage controlled by a gto thyristor chopper 7 vsc based hvdc link modeling of a forced commutated voltage sourced converter high voltage direct current vsc hvdc transmission link index terms ac motor drives dc motor drives hvdc converters power system dynamic stability pulse width modulated power converters static var compensators thyristor converters
